Overview

- Present Representative Project
- Links to project artifacts (docs, code)

Project: Vehicle Inventory System

- Problem:

  Track vehicles through acquisition to crush on retail yard (Pick & Pull)

- Simplify entry for yard personnell

Project: Vehicle Inventory System

SSI's PnP operation bought vehicles, operated a u-pull-it business, and then converted them to scrap product.

Project: Vehicle Inventory System

- Client had been tagging with code39 barcodes for some time, intending to use them.

- This was a very well thought out solution & I was hired to implement it as BSA was finalizing reqs.

Project: Vehicle Inventory System

Defined Solution

- Develop a system using windows Mobile devices (intermec ck3s) and existing enterprise datastores to track the vehicle on the lot, and look up data from VIN.
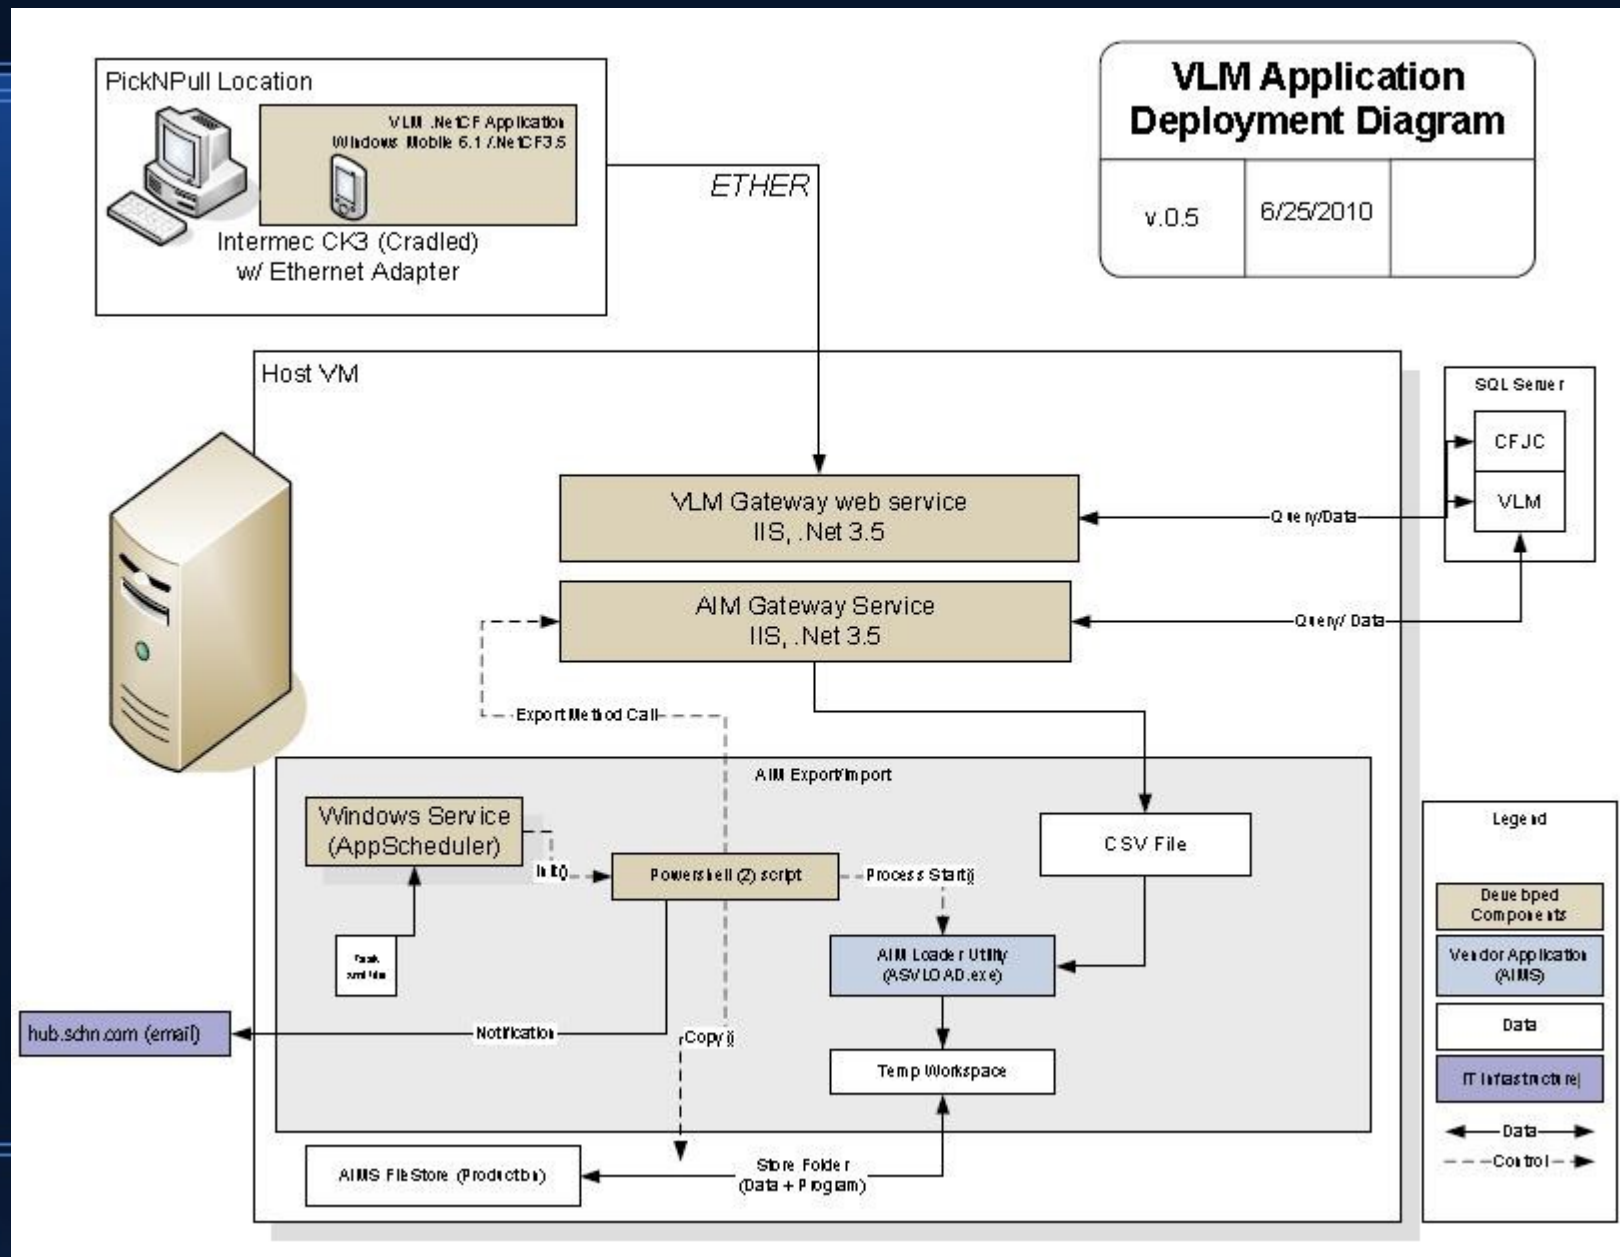

Project: Vehicle Inventory System

Mobile client

- Intermec ck3
- Integrated scanner
- Ethernet dock
- Ruggedized
- Windows Mobile 6
- .Net Compact 3.5
